

Role: Junior Solutions Architect

Industry Type: IT Services and Consulting

Experience: 3+ Years

Employment Type: Full time, Permanent

Location: South Africa

Role Summary:

We are looking for a full-time Junior Solutions Architect with 5+ years of experience to join our core team in South Africa.

Location:

As this is a remote role, we will consider applicants from all over South Africa as you will be comfortably set up to work from anywhere in the country. However, in-office working is available to applicants as needed.

Desired Candidate profile:

The ideal candidate needs to have a passion for advancing the organisation's business needs and determining how the overall delivery of the Korber Application can support the customers' vision and current growth in delivering an efficient, productive system and processes that deliver quality output. The Junior Solutions Architect must cater to the organisation's requests in a multi-tiered components of application software, physical infrastructure, business models and processes, forward-thinking and longevity across internal and external resources.

Role Responsibilities and Functions:

- A comprehensive understanding of Warehouse Management Systems (WMS) and Supply Chain and Logistics faculty
- Solid SQL Server knowledge and practice designing, describing, and managing solutions to business problems and or new implementations/requirements
- Manage the project with multiple resources, which include mentoring, training, meeting project deadlines within expected quality
- Lead onsite consulting independently
- Be able to define small to medium-sized projects while working alongside a senior solutions architect and customers.

- Actively contribute to the planning meetings, define business cases, unit testing, and specifications documents
- Problem Solve, troubleshoot, and translate business requirements into software applications and models
- Demonstrate a strong understanding of servers, architecture, and internal design of the application
- Capable of developing new processes with complex functionality independently
- Adhere to Code standards and best practices
- Communication across all channels
- Have experience working with development teams using PMO and scrum methods

Job Requirements:

- Bachelor's degree or higher qualification in Computer Science or related field
- Warehousing, distribution centre, and Supply Chain & Logistics experience beneficial
- Experience with Körber Supply Chain's WMS or other similar WMS is beneficial
- 5-8 years of professional experience developing high-quality software
- Experience with IT Infrastructure and cloud development
- Experience with Business analysis and DevOps
- Must have an analytical mind with problem-solving abilities
- Must be customer service orientated
- Project and Product Management skills required
- Strong development experience using C# and .NET technologies required.
- Development experience using Web Services
- Development experience using MS SQL Server
